molecular farming of plants and animals for human and veterinary medicine is available in our digital library an online access to it is set as public so you can get it instantly.

Rather than enjoying a good book with a cup of coffee in the afternoon, instead they are facing with some malicious bugs inside their computer. Such action of natural herbicides, and other related chemical interactions, is called allelopathy. Using plants to manage pest populations below economic damage thresholds by integrating strategies that are based on biological control, such as the introduction of natural enemies or the use of alternative host plants, is a common and effective strategy in integrated pest management.
