Sustainable Tourism in Protected Areas - Paul F. J. Eagles - 2002
Tourism is good business, as it produces 4.4% of the world's GDP, and employs around 200 million people globally. It can also help the sustainable management of protected areas, as a market-based alternative catering to the growing number of discriminating travelers trying to find, understand and enjoy a natural environment. This publication is designed to assist protected area managers and other stakeholders in the planning and management of protected areas, visitor recreation and the tourism industry, so that tourism can develop in a sustainable fashion, while respecting local conditions and local communities.

Protected Areas, Sustainable Tourism and Neo-liberal Governance Policies - Hubert Job - 2020-04-28
From its late nineteenth century origins, the concept of protected areas has increased in scope and complexity. It now has to come to terms with the twenty first century world of neo-liberal politics, performance metrics and the growing and complex demands of tourism. This international collection of papers explores how this might be done, detailing the issues involved, and the value and values that protected areas have for economies, peoples and environments. Special attention is given to World Heritage Sites, tourism planning and their communities, to the growth of private protected areas, and to the health values of protected areas. Other subjects include private sector business involvement in protected areas, concessions policy experiments, and discuss visitor management, provide guidelines to enhance the quality of the tourism experience. The focus is global and the book will appeal to both academics and practitioners.

Sustainable tourism in protected areas guidelines for planning and management world commission on protected areas best practice protected area guidelines 8

When people should go to the ebook stores, search start by shop, shelf by shelf, it is in point of fact problematic. This is why we offer the book compilations in this website. It will agreed ease you to see guide sustainable tourism in protected areas guidelines for planning and management world commission on protected areas best practice protected area guidelines as you such as.

Tourism, Ecotourism, and Protected Areas - Hector Ceballos-Lascurain - 1996
Tourism has an essential role in terms of contributing to the financial sustainability of protected areas. In addition, through effective and efficient benefit-sharing, tourism can positively impact numerous stakeholders within and beyond the protected area. Living on the Edge: Benefit-Sharing from Protected Area Tourism highlights the complexity of benefit-sharing, the importance of identifying all relevant stakeholders, the challenges of ensuring equity and sustainability, and the critical importance of good governance. The evolution of benefit-sharing mechanisms over time also emphasizes a continuing need to evolve and adapt to each unique situation as much evidence indicates that little has changed for those living on the edge. Although this book focuses on benefit-sharing from protected area tourism, it is essential to acknowledge that along with these benefits are costs associated with tourism, including possible increased local prices, loss of access to land, human-wildlife conflict, and other related costs. The contributing authors agree that benefit-sharing must include good governance, accountability, equity, transparency, a broad reach of stakeholder engagement, and a robust combination of tangible and intangible benefits - with recognition that benefit-sharing systems need to be adaptive and evolve, as needed, according to the relevant situation. The chapters in this book were originally published as a special issue of the Journal of Sustainable Tourism.

Living on the Edge - Susan Snyman - 2021-05-07
Tourism has an essential role in terms of contributing to the financial market demands, and to the challenges of sustainable development. It concludes with a searching interview with a member of UNESCO's World Heritage Committee. The chapters were originally published in a special issue in the Journal of Sustainable Tourism.
tourism industry, public sector and leading agencies. The book explores the benefit-sharing, tourism can positively impact numerous stakeholders within and beyond the protected area. Living on the edge: Benefit-Sharing from Protected Area Tourism highlights the complexity of benefit-sharing, the importance of identifying all relevant stakeholders, the challenges of ensuring equity and sustainability, and the critical importance of good governance. Environmental Impacts of Tourism in Developing Nations - Sharma, Ravi - 2018-09-07

In the face of rapid industrialisation in the last few decades, the tourism economy has blossomed into a major industry with positive impacts such as economic growth, infrastructure development, employment, and income generation. However, tourism brings negative environmental effects such as degradation of landscapes and habitats, increased vulnerability of avifauna and wildlife, and pollution leading to the decline of species. Environmental Impacts of Tourism in Developing Nations is a pivotal reference source that explores some of the critical challenges faced in the tourism economy particularly with regard to the impacts on the environment in developing nations. It also explores the impact tourism plays in the biophysical environment such as the issue of climate change. While highlighting topics such as environmental justice, ecosystems, and ecotourism, this book is ideally designed for academicians, policymakers, environmentalists, tourism professionals, and graduate-level students seeking current research on the environmental and economic impacts of tourism.

Sustainable Tourism - Dr. David A. Fennell - 2020-01-30

This new textbook provides a comprehensive overview of sustainable tourism framed around the UN’s sustainable development goals. It examines the origins and dimensions of sustainable tourism and offers a detailed account of sustainable initiatives and management across destinations, the principal values and priorities in sustainable development through a better understanding of values, ethics and human nature. It covers a broad range of studies from an array of disciplinary perspectives and includes learning objectives, discussion questions and international case studies throughout. It is an important text for students and researchers in tourism and sustainability.

Sustainable Tourism V - F. D. Pineda - 2012

Tourism has become a major international industry, with many countries all over the world relying on the income it produces. Its economic advantages as a major source of finance and employment leads to its active promotion by governments and other institutions, independent of the consequences on the environment, ecology and social structure of affected regions. Conference topics include the following: Tourism strategies; Tourism as a tool of development; Emergent strategies for tourism development; Environmental issues; Climate change and effects of natural hazards in tourism; Tourism and protected areas; Art, architecture and culture; Rural tourism; Modelling; Community involvement; Tourism and the built environment; Renovation of mature destinations; heritage tourism; medical tourism. Sustainable Tourism V 2012 will adopt a multi-disciplinary approach and will aim specifically to foster greater understanding and collaboration between scientists and social science experts, practitioners and policy makers. It will take a broad view of this sophisticated and complex industry, and will examine the practice of sustainable tourism from global travel trends through to destination and site management. Innovative solutions, those that have particularly so far only been marginally welcome, as well as cultural initiatives that will lead to better approaches to tourism with the objective of preserving the diversity of our planet.

Sustainable Tourism III - F. D. Pineda - 2008
Tourism, internationally, is the largest economic sector both in terms of earnings and number of people employed. Understandably, the economic advantages have led to the active promotion of tourism by governments and other institutions, often independent of the consequences on the environment. The challenge is to balance the need for a low impact on the environment and local culture, while helping to generate income, employment and the conservation of local ecosystems. Sustainable tourism has to be both ecologically and culturally sensitive. This book contains papers presented at the Third International Conference on Sustainable Development, held in Malta. The Meeting focused on empirical work and case studies from around the world, and the book offers new insight and best practice guidance for supporting sustainable tourism. Adopting a multi-disciplinary approach, this book examines the practice of sustainable tourism from global travel trends through to destination and site management. Of interest to scientists, practitioners and policy makers, the topics covered in this volume include: Art, culture and nature; Climate change and tourism; Coastal issues; Community involvement; Ecological issues; IT and tourism; Modelling and estimates; Risk and safety; Rural tourism; Tourism and protected areas; Tourism as a factor of development; Tourism as a tool of urban development; Tourism impact; Tourism strategies.

Tourism and Protected Areas in Brazil - Stephen Mccool - 2018
Tourism and Protected Areas in Brazil - Stephen Mccool - 2018
Reframing Sustainable Tourism - Stephen F. McCool - 2015-08-19
This book examines the need for a new way of describing sustainable tourism and also looks at the frameworks needed to rethink how to apply this to communities, private operators and protected area managers. It makes it clear that tourism is just one of many human activities that affects host communities. The work includes informative and provocative case studies with realistic applications. References included in the book will help graduate students formulate new hypotheses and suggest literature for them. Tools and techniques useful to tourism practitioners suggest innovative approaches to marketing, management and community development.

Tourism - Leszek Butowski - 2016-05-04
Tourism is that area of activity of contemporary man that touches on various fields of human interest. Representatives of numerous academic disciplines find it intriguing for its exceptionally interdisciplinary character. Conditions for and consequences of the development of tourism are investigated, among others, by economists, geographers, sociologists, experts in culture, anthropologists, management and social policy specialists and even by representatives of some natural sciences. Researchers dealing with tourism need to meet strict methodological requirements, but they get access to a very interesting subject of scientific inquiry, which combines social, cultural, economic and environmental aspects to create an ontologically new quality offering epistemological challenges.

Sustainable Tourism in Protected Areas? - Batabyal, Debasish - 2018-06-08
Different tourism sites and destinations require different management approaches to maintain resources for both tourists and native populations. Through evaluating ongoing patterns in the industry, businesses are able to maintain an equilibrium between the local community and tourist populations. Managing Sustainable Tourism Resources is a scholarly publication that takes an in-depth look at the different aspects of tourism as well as its impacts on cultural awareness, ecological harmony, and diversity. Additionally, it analyzes the operational functions within varying types of tourism and business strategies including women entrepreneurship, tourism in national parks and sanctuaries, and sustainable management. This book is a vital resource for entrepreneurs, policy makers, managers, economists, business professionals, academics, and researchers seeking coverage on the management and sustainable tourism.

Natural Area Tourism - David Newsome - 2017-01-01
Only added for successful withdrawal

Ecotourism - Stephen Wearing - 2009
Explores the impact of mainstream tourism and the potentially positive social and environmental benefits of ecotourism.

Sustainable Tourism IV - C. A. Brebbia - 2010
Tourism has become a major international industry, with many countries all over the world relying on the income it produces. Because it is a major source of finances and employment, government and other institutions actively promote tourism, regardless of the impact on the environment, ecology and social structure of the region. The demands of tourism can contribute to the destruction of the natural and cultural environment upon which it depends. The natural and cultural landscape's capacity to accommodate the local and worldwide effects of tourism, the typology thereof and its implications for the economy and society constitute very important study objectives. The development of tourism can result in the degradation of natural landscapes that paradoxically attract tourists to such areas. Featured topics include: Tourism Strategies; Tourism as a Tool of Development; Tourism Impact; Tourism and Protected Areas; Rural Tourism; Community Involvement; IT and Tourism; Climate Change and Tourism; Environmental Issues; Art, Architecture and Culture; Modelling; Emergent Strategies for Tourism Development; Landscape and Tourism; Tourism and Urban Planning.

Sustainable Tourism as a Factor of Local Development - Valentina Castellani - 2009

Sustainable Tourism as a Factor of Local Development - Valentina Castellani - 2009

Adaptive Co-Management - Derek Armitage - 2010-10-01

In Canada and around the world, new concerns with adaptive processes, feedback learning, and flexible partnerships are reshaping environmental governance. Meanwhile, ideas about collaboration and learning are converging around the idea of adaptive co-management. This book provides a comprehensive synthesis of the core concepts, strategies, and tools in this emerging field, informed by a diverse group of researchers and practitioners with over two decades of experience. It also offers a diverse set of case studies that reveal the challenges and implications of adaptive co-management thinking.

Ecotourism and Conservation in the Americas - Amanda Stonzar - 2008

Using several case studies, regional overviews and thematic analyses, this book evaluates the pros and cons of ecotourism for communities and ecosystems. Focusing on the Americas, it draws perspectives from private tour operators, non-governmental conservation and development organizations, local and indigenous communities and tourism researchers.

Focusing on the Americas, it draws perspectives from private tour operators, non-governmental conservation and development organizations, local and indigenous communities and tourism researchers.

Tourism, nature and sustainability - Hogne Øian - 2018-05-24

Recently, the Nordic countries have experienced a rapid growth in numbers of visitors. At some popular nature attractions this has resulted in crowding, environmental damage, costly rescue operations and overload on public infrastructure. Implementation of economic policy instruments have hence been suggested to secure a more sustainable development. While the applicability of e.g. entrance fees is restricted by the public rights of access, economic instruments tend to represent short-sighted solutions. Sustainable development requires holistic policies, which take environmental, social and economic aspects into consideration in a long-term perspective. To achieve a more sustainable development of tourism, it is suggested that a limited use of economic instrument should take place in combination with adaptive management strategies and available legal and administrative instruments.

Measuring the Sustainability of Protected Area-based Tourism Systems - Surya Poudel - 2014

This research assessed the sustainability of protected area-based tourism systems in Nepal. The research was composed of three interrelated studies. The first study evaluated different approaches to protected area governance. This was a multiple-case study research involving three protected areas in Nepal: the Annapurna Conservation Area, Chitwan National Park, and the Kanchenjunga Conservation Area. Data were collected using the survey method. Respondents included 230 residents and 205 tourists in Annapurna, and 220 residents and 210 tourists in Chitwan. The findings revealed that the residents across these protected areas perceived positive and negative impacts differently, as did the tourists, suggesting that the form of tourism development affects the sustainability outcomes in protected areas. Overall, this research concluded that protected areas and tourism are intricately related, and sustainable management of a protected area-based tourism system requires a polycentric adaptive approach that warrants a broad participation of relevant stakeholders.

Mediterranean Protected Areas in the Era of Over-tourism - Ante Mandić - 2021-04-19

This book comprises studies that reflect on various influences of excessive tourism development in protected areas, and solutions designed and initiated to mitigate such challenges. A large proportion of tourism in Mediterranean destinations constitutes nature-based tourism, in particular, tourism in parks and protected areas. As a destination experiences higher intensity and density of tourism, the potential conflict between maintaining a healthy natural environment and economic development also increases. This has urgent planners and decision-makers to devise and adopt innovative
nature conservation. This book demonstrates the importance of collaboration across and beyond disciplines and of all groups of stakeholders for maximization of societal impacts and tourism-related benefits.

Sustainable Transportation in Natural and Protected Areas - Francesco Orsi - 2017-12-08
Protected areas are at the centre of nature-based tourism, which is increasingly popular across the world. As visitor numbers increase, so does awareness of the harmful effects that large crowds may have on both natural resources and individual recreational experience. This volume considers the challenge of transportation to and within natural and protected areas, the improvement of which has already been recognised as having great potential for mitigating the environmental impacts of ecotourism. While several books have focused considerable attention to the management of protected areas in general, little has been said about the specific issue of sustainable transport, an emerging trend that is already reshaping visitation patterns in natural settings. This book provides current knowledge on issues associated with the transportation of visitors in natural and protected areas, and a comprehensive overview of the technical and strategic options available to tackle these issues. It approaches the subject via three main topics: preferences, or the visitors' attitudes towards transportation; practices, where current approaches are assessed through examples and case-studies of successful experiences and methodologies from around the world; and policies, where suggestions and recommendations are put forward for both local scale strategies and broad-scale regulatory action with global relevance. Contributors include academics in the field of natural resource management and tourism, with extensive experience in protected area management and active partnerships with natural park administrations.

Tourism and Natural Protected Areas - M. F. Schmitz - 2013-10-16
In the USA. It is famous worldwide. Since their creation in 1872, most ‘protected natural areas’ have been considered as probably the greatest achievement of nature conservation. Many countries have such spaces within their territories and many visitors, native or foreign, use some of their free time to get to know them. In this sense these spaces undertake to conserve nature and educate society and give us a kind of cultural tourism that has grown considerably in recent decades. Cultural tourism today specifically includes, along with cities, museums, monuments and rural traditions, the aim of ‘getting to know nature’. Protected natural areas are ideal for this. The tourism industry has realised this and so the value of the landscape and natural resources is becoming increasingly recognised. This is a welcome development and represents a challenge for tourism management, for environmental education and for dissemination of nature and conservation. This volume of the series Tourism Today considers the evolving relationship between tourism and protected natural areas.

Tourism and Natural Protected Areas - M. F. Schmitz - 2013-10-16
Yellowstone National Park spans the states of Montana, Wyoming and Idaho in the USA. It is famous worldwide. Since their creation in 1872, most ‘protected natural areas’ have been considered as probably the greatest achievement of nature conservation. Many countries have such spaces within their territories and many visitors, native or foreign, use some of their free time to get to know them. In this sense these spaces undertake to conserve nature and educate society and give us a kind of cultural tourism that has grown considerably in recent decades. Cultural tourism today specifically includes, along with cities, museums, monuments and rural traditions, the aim of ‘getting to know nature’. Protected natural areas are ideal for this. This is a welcome development and represents a challenge for tourism management, for environmental education and for dissemination of nature and conservation. This volume of the series Tourism Today considers the evolving relationship between tourism and protected natural areas.

The Role of Sustainable Tourism Activity on Supporting Protected Natural Areas - Gabriela Stanciulescu - 2010
The protected natural areas, by their aesthetic, recreational, educational and scientific valences, represent extremely attractive tourist destinations, some of them unique at international level. Their touristic exploitation has different forms from a country to another, from a type of protected area to another. In this paper, the analysis performed point out that the exploitation of natural areas by tourism has different forms, according to their extension, their landscape complexity, their structure and dynamics of the environment components. The touristic theory identifies a series of tourist forms associated to the environment preservation, such as: tourism in natural areas, ecotourism, adventure tourism, tourism in wilderness, camping. As a conclusion, we can say that the protected areas have become more and more a part of tourism, being appreciated as they represent an environment less affected by the human pressure. Presently, they generate a new form of tourism called tourism in protected areas, requiring special care on behalf of the governments in order not to aggravate the impact of tourism on the local environment and cultures.

In this paper, the analysis performed point out that the exploitation of natural areas by tourism has different forms, according to their extension, their landscape complexity, their structure and dynamics of the environment components. The touristic theory identifies a series of tourist forms associated to the environment preservation, such as: tourism in natural areas, ecotourism, adventure tourism, tourism in wilderness, camping. As a conclusion, we can say that the protected areas have become more and more a part of tourism, being appreciated as they represent an environment less affected by the human pressure. Presently, they generate a new form of tourism called tourism in protected areas, requiring special care on behalf of the governments in order not to aggravate the impact of tourism on the local environment and cultures.
