Examples of speaking performance at CEFR levels

Twenty test takers distributed in 10 pairs were used during phase 1. They were taken from an available pool of 25 speaking tests which are used for rater training purposes and are marked against a global and analytic Main Suite oral assessment scale. The selection of the 10 pairs was based on the Main Suite marks awarded, and typical performances

15+ Internal and External Validity Examples | Examples

There are different four types of test validity in statistics: construct, content, criterion, and face. In experiments where we are relating an effect with a possible cause, researchers use internal and external validity to test this relationship.

Word Macro Examples & VBA Tutorial - Automate Excel

Range, Selection, Paragraphs. Range and Selection are probably the most important objects in Word VBA, certainly the most used. Range refers to some portion of document, usually, but not necessarily, text. Selection refers to selected text (or other object like pictures) or, if nothing is selected, an insertion point.
